X	73%	2016	U.P. Board

Skills & Tools

- C#, ASP.NET Core MVC, SQL, GIT, Stored Procedures
- Entity Framework, LINQ, HTML, CSS, JavaScript

Certifications

- Udemy Certification– Complete guide to ASP.NET Core MVC (.NET 6)
- Udemy Certification– ASP.NET Core 5.0 MVC The Beginners Guide To Becoming A Pro

Experience

LIGMOS Solutions | July 2025 – March 2026 (Software Engineer)
Duration: July 2025 – March 2026

- Developed a Leave Management System using ASP.NET Core MVC and Entity Framework Core.
- Designed and implemented user authentication and role-based access (Admin, Manager, Employee).
- Created CRUD Operations for leave requests, leave types, and employee records.

MNJ Software Private Limited | April 2024 – Jun 2025 (Dotnet Developer)
Duration: 10 Months

- Developed web applications using ASP.NET Core MVC and Entity Framework Core.
- Collaborated with a team to design and implement RESTful APIs.
- Created dynamic pages and performed CRUD operation.

Multifuel Management Private Limited | July 2022 – April 2024 (Software Developer)
Duration: 1.10 Years

- Maintained and enhanced an existing **MVC-based Fuel Collection System**.
- Started as a **Trainee** and later transitioned to **Developer** role based on performance.
- Fixed bugs, improved existing features, and supported day-to-day maintenance.

Multifuel Management Private Limited | August 2021 – July 2022 (Graduate Engineer Trainee)

Duration: 1 Years

- Worked as a trainee, learned .NET technology and created a sample module of Fuel Master.

Projects

▪ Leave Management System

Duration: July 2025 – March 2026

Technologies: C#| ASP.NET Core MVC 6| LINQ | SQL Server 2019 | CRUD | JavaScript | JQuery

Built a role-based Leave Management System with separate Admin, Manager, and Employee portals. Admin manages complete leave workflow and monitors approved, rejected, and pending requests via dashboard. Managers approve employee leave and apply their own, while employees can apply and track leave status.

▪ Matrimony App

Duration: April 2024 - Feb 2025

Technologies: C# | ASP.NET Core MVC 6 | LINQ | SQL Server 2019

Matrimony app is a web-based application which offers seamless marriage services, featuring intelligent profile matching and budget-friendly wedding planning tools. The system suggests compatible matches based on preferences and provides location-based vendor recommendations, venue selection, and event management. Platform ensures a user-friendly experience with real-time service integration.

▪ Fuel Collection Software

July 2022 - April 2024

Technologies: C# | ADO.NET | MVC | Java Script | HTML | SQL Server 2019

Fuel Management Software is a web-based application that manages fuel used in a biogas power plant. It monitors various fuel types such as cow dung, wheat straw, paddy straw etc. The system tracks fuel inventory levels, records fuel supply to the biogas plant, and provides real-time reporting, analytics and cost optimization features. It ensures operational transparency, improved efficiency and a secure, user-friendly experience.

▪ Bulky Book Web

Duration: March 2022 - June 2022

Technologies: C# | ASP.NET Core MVC 6 | LINQ | SQL Server 2019 | HTML | Bootstrap

Bulky Book is a full-stack web application designed to streamline the process of buying and selling books online. It features a user-friendly interface that allows different type of users to login into system and browse for books from listing, view detailed information about each book, and make purchases directly through the website using Stripe payment gateway. The application includes a secure and efficient checkout process as well as the ability for users to create and manage their own book listings, users and order processing.
